#### Question-1:

Write a code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100cms send an "Alert" to IBM cloud and display in the device recent events.

#### Code:

## IBM cloud output:

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes the platform name, a user profile icon, and the email address 311119205017@smartinternz.com with ID: eb68f4. The main navigation menu on the left contains icons for various functions. The top navigation bar also includes links for 'Browse', 'Action', 'Device Types', and 'Interfaces', along with an 'Add Device' button. The 'Recent Events' tab is selected, showing a table of events. The table has four columns: 'Event', 'Value', 'Format', and 'Last Received'. The events listed are 'event1', 'Data', 'Data', and 'Data', all in 'json' format. The 'Last Received' times are 'a few seconds ago' and '3 minutes ago'.

Event	Value	Format	Last Received
event1	{"Distance":15,"ALERT!!":"Distance less than 10...	json	a few seconds ago
Data	{"Distance":68.95,"ALERT!!":"Distance less than ...	json	3 minutes ago
